

Group 4 – Top Deck Studios

Reflections:

Callum Freer (2606259) Reflection

For this assignment I did most of the animations with Chris helping with the timings of things. His input was very helpful as his input made the animation a lot better giving timings for things. I would like feedback on the readability of the animation. One of my focuses is on expressive animation, I don't think this animatic is very expressive and I would like some feedback and advice for the final animation.

Christopher Ridley (2459262) Reflection

The main thing I would like feedback on for this submission is the timing. I know there is room for improvement in this area, but I also feel that it is very well polished at this stage. I have found working with Callum to be very beneficial as he is way more skilled in this course than myself being more of a coder and game designer. I am learning a lot from working with Callum and have found this project and group to be very positive to my overall growth and learning to the course. I've learnt a lot about timing through trial and error.

YouTube Links

For our YouTube submissions we are uploading 2 versions of the animatic. One version is the original 1080x1080 injected animatic. When we were uploading it, it uploaded as a YouTube short due to it's 1:1 aspect ratio. We found this wasn't too ideal so we edited the video to have a 16:9 aspect ratio so it uploads as a regular YouTube video.

We did not have time to re-render our animatic for VR with a 16:9 aspect ratio so it might be a bit stretched so we could have an upload that is not a short.
